The mind (not to be confused with the brain) is a set of cognitive faculties including consciousness, imagination, perception, thinking, judgement, language and memory. It is usually defined as the faculty of an entity's thoughts and consciousness. It holds the power of imagination, recognition, and appreciation, and is responsible for processing feelings and emotions, resulting in attitudes ...

Mind - Wikipedia

Books I've read. Tiny summary but detailed notes for each. Use the ISBN number to find it from your local library or anywhere else. This page will constantly update as I read more, so bookmark it if you want to check back in a few months.. Sorted with my top recommendations up top. Sort by title, newest, or best. And please read this FAQ page about these notes, if you have any questions.

BOOKS | Derek Sivers

Frequently in my early teaching career, I taught a computer literacy course. In this course I taught my student that a computer is a machine for the input, storage, processing, and output of information.
