3d Printing The Ultimate Guide

This was the first commercial 3D printing method. He first thought of the idea in 1983 while using UV light to harden tabletop coatings. In 1986 he received the patent for the process. By the way, Charles Hull is also the person who invented the .STL file format, which is the most common 3D printing file format.

The Ultimate Guide to 3D Printing - 101 Questions Answered

The Ultimate Guide to 3D Printing in Color. In this tutorial, we'll be going over 5 techniques for adding color to your 3D prints. We'll start with lower cost options like filament swapping and dual extrusion, and work our way up to expensive and industrial options like PolyJet and Binder Jetting.

The Ultimate Guide to 3D Printing in Color

This 3D Printing guide is exactly what you need to get started understanding the importance of this technology. The author takes a rather complex process and breaks it down so you can understand it and take full advantage.
