A Universe from Nothing. Jump to navigation Jump to search. A Universe from Nothing: Why There Is Something Rather than Nothing is a non-fiction book by the physicist Lawrence M. Krauss, initially published on January 10, 2012 by Free Press. It discusses modern cosmogony and its implications for the debate about the existence of God.

### **A Universe from Nothing - Wikipedia**

"In A Universe from Nothing, Lawrence Krauss has written a thrilling introduction to the current state of cosmology—the branch of science that tells us about the deep past and deeper future of everything. As it turns out, everything has a lot to do with nothing—and nothing to do with God. This is a brilliant and disarming book."-- Sam Harris, author of The Moral Landscape

Community Reviews. Because there is a law such as gravity, the universe can and will create itself from nothing. Spontaneous creation is the reason there is something rather than nothing, why the universe exists, why we exist. It is not necessary to invoke God to light the blue touch paper and set the universe going.

Trying to make the cosmos out of nothing. Yet despite its clear strengths, A Universe From Nothing is not quite, as Richard Dawkins hopefully declares in the afterword, a “knockout blow” for the idea that a deity must have kicked the universe into being. Krauss does want to deliver that blow: towards the end of the book,...

Explaining the origin of the universe is an enormous challenge for those seeking to deny their Creator: How could a universe come from nothing? The challenge is so great that some have argued that the universe simply did not even have a beginning, but has existed eternally. However, because most professing atheists have accepted the big bang model of the universe, they have accepted the ...
