Fig. 1 shows a roadmap of connecting tourism industry with sustainable development around the world. Since the late 1980s, the research in tourism field has given substantial focus on the issue of sustainability (or sustainable development) (). At that time, the concept to connect tourism activity and the environment, known as "alternative tourism", was proposed and developed ().

In vitro evaluation of the skin permeation of drugs. In vitro methods enable precise control of experimental variables by using the simplest protocols. However, in vitro assays cannot fully reproduce the complexity of biological systems, and in vivo evaluations are recommended to validate the results and, if possible, establish an in vivo-in vitro correlation.
