

Aerial Photography And Image Interpretation

Aerial Photography And Image Interpretation

Photographic interpretation is “the act of examining photographic images for the purpose of identifying objects and judging their significance” (Colwell, 1997). This mainly refers to its usage in military aerial reconnaissance using photographs taken from reconnaissance aircraft and satellites.. The principles of image interpretation have been developed empirically for more than 150 years.

Aerial photographic and satellite image interpretation ...

Aerial photography (or airborne imagery) is the taking of photographs from an aircraft or other flying object. Platforms for aerial photography include fixed-wing aircraft, helicopters, unmanned aerial vehicles (UAVs or "drones"), balloons, blimps and dirigibles, rockets, pigeons, kites, parachutes, stand-alone telescoping and vehicle-mounted poles.. Mounted cameras may be triggered remotely ...

This year is the centenary of a cartoon that has had a remarkable influence on architecture. Published in Life magazine's "Real Estate Number" of March, 1909, the full-page cartoon by A.B. Walker shows conventional houses stacked on an open skyscraper frame. Its caption reads, "Buy a cozy cottage in our steel constructed choice lots, less than a mile above Broadway."
