Allis Chalmers 516 Engine

I acquired a Genset powered by a 11000 MKII engine 516 cu.in. (690 hr) Have somebody that is thinking about making a pulling engine out of it. I have seen a D-21 puller with a 516. Has anyone here used one? To me they seem like a bit of a boat anchor.

the 516 was used in hd11 crawlers, and 745 loaders. those used roosa fuel systems. the N7 version got a bosch P pump and 275 hp. I too thought that would have been a better choice for larger tractors, but it is still one of the old buda designed engines, though ac re-designed to direct injection in the 60's. the 8550 used a 731, which is a de-stroked version of the old buda 844, or 16000.
