In the Layout Editor, you can quickly build layouts by dragging UI elements into a visual design editor instead of writing the layout XML by hand.

Build a UI with Layout Editor | Android Developers

First, you need to remove what's already in the layout. So click TextView in the Component Tree window, and then press Delete. In the Palette, click Text to show the available text controls.; Drag Plain Text into the design editor and drop it near the top of the layout. This is an EditText widget that accepts plain text input.; Click the view in the design editor.

Manual Installation. If you do not wish to use Maven, you can manually include the Localytics package in your project. Download the latest version of the SDK here. Unzip the archive and drag the JAR into your project's libs directory.. Update your project's app-level build.gradle to add dependencies for the Localytics JAR, Android Support v4, and Google Mobile Ads as follows.

Android | Localytics Documentation

The Android TV Input Framework (TIF) simplifies delivery of live content to Android TV. The Android TIF provides a standard API for manufacturers to create input modules for controlling Android TV, and enables live TV search and recommendations via metadata published by the TV Input.
