

Animals Science A Z

Animals Science A Z

Chameleon The chameleon is a very distinctive and well-known species of lizard, due to the large eyes and curled tail of the chameleon. Chameleons are found throughout jungle and desert alike, in Africa, Asia and parts of Southern Europe and chameleons have also been introduced to parts of North America. There are thought to be more than 160 different species of chameleon that range from just ...

The current model for maturation of the mammalian miRNAs is shown in Figure 2B. The first step is the nuclear cleavage of the pri-miRNA, which liberates a ~60-70 nt stem loop intermediate, known as the miRNA precursor, or the pre-miRNA Lee et al. 2002, Zeng and Cullen 2003. This processing is performed by the Drosha RNase III endonuclease, which cleaves both strands of the stem at sites near ...
