State of the Apes: Infrastructure Development and Ape Conservation Infrastructure development in Africa and Asia is expanding at breakneck speed, especially in biodiversity-rich developing nations. This trend reflects governments' efforts to promote economic growth in response to increasing populations, rising consumption rates and persistent inequalities.

One of the first ways in which we learn to classify objects is into two groups: 1. living and 2. nonliving. In casual encounters with the material universe, we rarely feel any difficulty here, since we usually deal with things that are clearly alive, such as a dog or a rattlesnake; or with things that are clearly nonalive, such as a brick or a typewriter.

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.
