The area of study known as the history of mathematics is primarily an investigation into the origin of discoveries in mathematics and, to a lesser extent, an investigation into the mathematical methods and notation of the past. Before the modern age and the worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales.

History of mathematics - Wikipedia

The traveling salesman problem is a problem in graph theory requiring the most efficient (i.e., least total distance) Hamiltonian cycle a salesman can take through each of n cities. No general method of solution is known, and the problem is NP-hard. The Wolfram Language command `FindShortestTour[g]` attempts to find a shortest tour, which is a Hamiltonian cycle (with initial vertex repeated at ...

UNIT I. Interference of Light: Interference due to division of wavefront and division of amplitude, Young's double slit expt., Interference, Principle of Superposition, Theory of Biprism, Interference from parallel thin films, wedge shaped films, Newton rings, Michelson interferometer. Diffraction: Fresnel Diffraction, Diffraction at a straight edge, Fraunhofer diffraction due to N slits ...

In , w_0 (τ^{-1}) is the time response of the system to a unit impulse applied at time 0 and w_2 (τ^{-1}) is the time response of the system to an impulse of twice unit magnitude at time 0. These response functions represent the memory of the system. If the system is linear, then $w_2 = 2w_0$ and $h_1 = w_0$, which is why the first-order kernel is referred to as the linear unit impulse response.

A local anesthetic (LA) is a medication that causes absence of pain sensation. When it is used on specific nerve pathways (local anesthetic nerve block), paralysis (loss of muscle power) also can be achieved. Clinical LAs belong to one of two classes: aminoamide and aminoester local anesthetics. Synthetic LAs are structurally related to cocaine. They differ from cocaine mainly in that they have ...

Chapter 6: Health Promotion for the Infant Test Bank MULTIPLE CHOICE 1. Which milestone is developmentally appropriate for a 2-month-old infant? a. Pulled to a sitting position, head lag is absent. b. Pulled to a sitting position, the infant is able to support the head when the trunk is lifted. c. The infant can lift his or her head from the prone position and briefly hold the head erect.
