Quality assessment by science teachers: Five focus areas Frances Edwards*† ABSTRACT: In order to teach science well, science teachers need to know what to focus on in order to ensure their assessment of student learning is meaningful

Quality assessment by science teachers: Five focus areas

In education, the term assessment refers to the wide variety of methods or tools that educators use to evaluate, measure, and document the academic readiness, learning progress, skill acquisition, or educational needs of students. While assessments are often equated with traditional tests—especially the standardized tests developed by testing companies and administered to large populations ...
