More than 5 million teeth are avulsed each year due to sports injuries and trauma, 1 and in certain cases these avulsions can be attributed to the absence of a mouthguard or to improperly fabricated and fitted mouthguards. Not only do mouthguards protect the teeth, but they also protect the head against a blow to the jaw that can result in a concussion and loss of consciousness.

We all need to find the proteins that do well with our bodies and we are all different. That's why we use lists for muscle-testing. In general I've found over the last couple of decades that most blood type O people need to eat meat or they have no energy, their hair falls out and they bruise—they do not make healthy vegetarians (no matter what they think—at least I've never seen one).
