Since B Braun Dialog problems appear infrequently I thought I might offer these tips to aid in detecting future problems. 1. The UF Pump is part of the DFS Test, although it is not shown as part of the diagrams, it is used to reduce PDA pressure. Therefore, it stands to reason that if it is leaking, it can drop PDA pressure!

b braun dialysis machine service manual pdf

OK, I'm back at this machine, still with no resolution. I've tried everything tech support has suggested. Here's what I've done: checked cal of blood side and water side transducers (numerous times), tried new blood pump and roller, checked accuracy of blood pump, and swapped the blood side transducer trio/board into another machine (that machine has not shown any TMP alarms).
