**Brick Kiln Design Manual**

This design manual is a first attempt at understanding and describing the robust structural design of brick kilns to rebuild kilns in the "right way". The need for development of such design has arisen in response to the structural damages that occurred to brick kilns from the 7.8 magnitude earthquake that hit Nepal in April 2015.

The designs of traditional brick kilns have been refined over many hundreds of years but there are other types of brick kiln in use which have been subject in recent years to systematic experiment to improve them. They are the Brazilian beehive kilns, the Argentine half-orange kiln, the European Schwartz kiln and the Missouri kiln of the U.S.A.
