Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

The ISI citation indexes provide variable coverage of different subject areas, with some areas being better represented than others. The column headed 'ISI coverage of journal literature (%)' in Table 11.1 indicates the proportion of references to articles in journals indexed by ISI, and therefore visible in any citation analysis. The journal coverage is highest in molecular biology and ...
