Book: Campbell Biology 10th Edition | Easy Notecards
Exam 1 Chapter 1-5.8 Campbell 10th Edition. the exploration of a biological system by analyzing the interactions among its parts. is the process by which information from a gene is used in the synthesis of a functional gene product. These products are often proteins, but in non-protein coding genes such as ribosomal RNA (rRNA), transfer RNA (tRNA) or small nuclear RNA (snRNA) genes, the product is a functional RNA.
