CHEMISTRY CALCULATIONS. There are relatively few calculations on this site, but you might be interested in my chemistry calculations book. If you have found this site helpful, you should find the book will help you as well.

chemistry calculations - chemguide

Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

Chemistry - Wikipedia

Second Semester / advanced 20 All about chemical equilibrium This thorough treatment sets out the underlying concepts without invoking thermodynamics or complicated calculations; considerable emphasis is placed on the distinction between Q and K. The section on equilibrium calculations contains problem examples illustrating techniques such as iterative and graphical solutions of polynomials ...

The time-saving online video lessons in the Introduction to Chemistry unit provide a basic overview of chemistry and cover topics which, while not unique to Chemistry, are necessary prerequisites to the study of Chemistry.

Chemistry - Science - Brightstorm

The finish line is found by adding the start and the change entries in each column. We are assuming the reaction goes forward when we used a "-x" for A and B; if we are wrong (the reaction actually goes backwards) the only thing that will happen is that x will be negative (which is no big deal). The entries on the finish line are the equilibrium concentrations of each component:

Class practical or Demonstration. This activity compares the colours of three halogens in aqueous solution and in a non-polar solvent. These halogens also react to a small extent with water, forming acidic solutions with bleaching properties.. Halogens undergo redox reactions with metal halides in solution, displacing less reactive halogens from their compounds.
