Sir: In this era of exponential growth of the “metabolic syndrome” and obesity, lifestyle modifications could be a cost-effective way to improve health and quality of life. Lifestyle modifications can assume especially great importance in individuals with serious mental illness. Many of these individuals are at a high risk of chronic diseases associated with sedentary behavior and ...

The reference intervals provided by our laboratory were established in our laboratory from healthy animals, using our own equipment with specific methods and reagents. Because results are analyzer-, method- and reagent- dependent, these intervals are only valid for results from our laboratory. We have reference intervals for hematology and chemistry for dogs, cats, horses, cattle, goats and ...

Veterinary medicine is the branch of medicine that deals with the prevention, control, diagnosis, and treatment of disease, disorder, and injury in animals. Along with this, it deals with animal rearing, husbandry, breeding, research on nutrition, and product development. The scope of veterinary medicine is wide, covering all animal species, both domesticated and wild, with a wide range of ...
