InfoNet will store an unlimited number of images and attachments per object. However there are old default fixed attachment fields, these have a green background to the data row.

InfoNet | Innovyze Insider Blog

the problem of this is when you have a large set of htmlAttributes, you have to repeat all the others just to switch the readonly???And it's even worse when you have other attributes (similar to readonly) to switch together independently, such as disabled, required, ...So suppose the number of such attributes is n, you need 2^n expressions with duplicated settings for other attributes.

How do I make EditorFor conditionally readonly?

This is a list of file formats used by computers, organized by type. Filename extensions are usually noted in parentheses if they differ from the file format name or abbreviation. Many operating systems do not limit filenames to one extension shorter than 4 characters, as was common with some operating systems that supported the File Allocation Table (FAT) file system.
