Cuneiform Records

Cuneiform is a system of writing first developed by the ancient Sumerians of Mesopotamia c. 3500-3000 BCE. It is considered the most significant among the many cultural contributions of the Sumerians and the greatest among those of the Sumerian city of Uruk which advanced the writing of cuneiform c. 3200 BCE.. The name comes from the Latin word *cuneus* for 'wedge' owing to the wedge-shaped ...

Cuneiform - Ancient History Encyclopedia

After 90 years, scholars finish a 21-volume dictionary for an extinct language. Why? With over 7,000 known languages spoken around the world today, it may seem fruitless for scholars to have spent the past 90 years creating a dictionary for a language that has been extinct for nearly 2,000 years.

The Ugaritic script is a cuneiform abjad used from around either the fifteenth century BCE or 1300 BCE for Ugaritic, an extinct Northwest Semitic language, and discovered in Ugarit (modern Ras Shamra), Syria, in 1928. It has 30 letters. Other languages (particularly Hurrian) were occasionally written in the Ugaritic script in the area around Ugarit, although not elsewhere.

Ugaritic alphabet - Wikipedia

Language existed long before writing, emerging probably simultaneously with sapience, abstract thought and the Genus Homo. In my opinion, the signature event that separated the emergence of palaeohumans from their anthropoid progenitors was not tool-making but a rudimentary oral communication that replaced the hoots and gestures still used by lower primates.

History of Writing

Writing Scribes were very important people. They were trained to write cuneiform and record many of the languages spoken in Mesopotamia. Without scribes, letters would not have been written or read, royal monuments would not have been carved with cuneiform, and stories would have been told and then forgotten.
