DESCRIPTION The Solar Electronics LISNs use a series inductor between the test sample and the power source to provide the impedance-versus-frequency characteristic. A coaxial connector with DC isolation is provided for connection to the associated frequency selective EMI meter. The power source end of the inductor is bypassed to ground.

VectorNav presents the Industrial Series, a complete line of MEMS-based, industrial-grade inertial navigation systems. Available in both surface mount and rugged packaging options and calibrated across temperature, the Industrial Series includes IMU, AHRS, GPS/INS and GPS-Compass solutions optimized for SWaP-C constrained applications.
