Documenting User Stories

User stories are often written on index cards or sticky notes, stored in a shoe box, and arranged on walls or tables to facilitate planning and discussion. As such, they strongly shift the focus from writing about features to discussing them. In fact, these discussions are more important than whatever text is written.

User Stories and User Story Examples by Mike Cohn

Go through the user stories in detail, try to finalize the open questions, perfect your mokups and describe and verify your user flow. If budget is available order the lunch or coffea/cake. Take meeting notes and write clear action points like what to be updated by who, etc.

Writing User Stories, Examples and Templates In Agile ...

Tips for working with user stories. Use the principle "just in time, just enough". Don't write too many details and don't write the stories too early. Write them when they are needed and sick to the template. Discuss and formulate the stories together with the team. Write user stories for 1-2 sprints ahead.

Using User Stories to Document Requirements | ReQtest

The level of detail a user story describes can differ, which means that a high-level user story (often called an epic) can consist of a number of lower-level user stories. Documentation based on user stories. Action-oriented docs can be based on user stories, which helps documentation writers make sure they write about things users actually need to know about. A user story is only valid if it is based on actual user needs.

Documentation based on user stories | Opensource.com

Describe an intention, not a feature. For example, instead of "I want to manage my profile" create a few Stories like "I want to be able to register", "I want to upload my profile photo", "I want to link my credit card to my profile" - each Story will have a different value. Keep it short.
