Doing Statistical Mediation and Moderation (Methodology in ...

To begin, we do need to understand that both analyses have to do with better understanding the relationship between an independent and dependent variable. In this regard, both mediation and moderation have to do with checking on how a third variable fits into that relationship.

What is the difference between moderation and mediation ...

Moderated mediation. Mediation and moderation can co-occur in statistical models. It is possible to mediate moderation and moderate mediation. Moderated mediation is when the effect of the treatment A on the mediator and/or the partial effect B on the dependent variable depend in turn on levels of another variable (moderator). Essentially, in ...
