An architectural drawing or architect's drawing is a technical drawing of a building (or building project) that falls within the definition of architecture. Architectural drawings are used by architects and others for a number of purposes: to develop a design idea into a coherent proposal, to communicate ideas and concepts, to convince clients of the merits of a design, to enable a building ...

### **Architectural drawing - Wikipedia**

In architecture and building engineering, a floor plan is a drawing to scale, showing a view from above, of the relationships between rooms, spaces, traffic patterns, and other physical features at one level of a structure.. Dimensions are usually drawn between the walls to specify room sizes and wall lengths. Floor plans may also include details of fixtures like sinks, water heaters, furnaces ...

76: Chapter 5: Figure 5.5A Design drawing plan of an office space drawn to a scale of 1/4 inch = 1 foot, 0 inches. Notice that there are no dimensions as would be found in a typical orthographic working drawing. In first-angle projection, the object lies above and before the viewing planes; the planes are opaque; and each view is pushed through the object onto the plane furthest from it.

### **Blueprint - Types of Views | Construction 53**

“As-built” Plans. As-built plans are required only for remodels or additions, and refer to plans showing existing construction. The term “as-built” can be a misnomer, in that technically it refers to the house as it was originally built; however, the term has become synonymous in most circles with “existing” construction.
