In Java programming, we can use the javadoc tool for generating API documentation from comments embedded in source code (Javadoc comments). However, it requires remembering various options of this tool, which is painful and time-consuming. Eclipse IDE can help to relieve this pain by providing the Javadoc Generation wizard. So this tutorial is going to walk you through the steps of generating ...

How to generate Javadoc in Eclipse - codejava.net

The Javadoc tool (running the standard doclet) extracts these specifications and formats them into browsable form (HTML web pages) which become the reference section of the documentation set describing the Eclipse platform to ISVs. As a consequence, the bar is significantly higher for API Javadoc than for non-API.
