Monetary economics is the branch of economics that studies the different competing theories of money. It provides a framework for analyzing money and considers its functions, such as medium of exchange, store of value and unit of account. It considers how money, for example fiat currency, can gain acceptance purely because of its convenience as a public good.

Market dominance is a measure of the strength of a brand, product, service, or firm, relative to competitive offerings. There is often a geographic element to the competitive landscape. In defining market dominance, one must see to what extent a product, brand, or firm controls a product category in a given geographic area.
