Electric power transmission is the bulk movement of electrical energy from a generating site, such as a power plant, to an electrical substation. The interconnected lines which facilitate this movement are known as a transmission network. This is distinct from the local wiring between high-voltage substations and customers, which is typically referred to as electric power distribution.

Electric power transmission - Wikipedia

Step 3 - Letter (s) of Reference and Proof of Insurance. Letter of Reference Submit the "Letter of Reference" from the application and have it completed by a past client or employer who may comment about your construction work/experience OR a code official who has inspected your work. Only one reference letter is necessary. Please include the completed reference with your application.

Milton Keynes was the last of the New Towns to be built and was formally designated in 1967. In 2016, Milton Keynes Council and Ringway, the contractors for the project, identified that older lanterns in Central Milton Keynes were coming to the end of their useful life and developed a plan for their replacement.
