Unit 7: Elements Compounds and Mixtures - Mr. Delemeester ...

What are three main differences between elements, compounds, and mixtures? I have difficulty solving this problem. I have an answer that I made for it: "Compounds form different substances, mixtures don't form something new without chemical combination and elements aren't combined or mixed". Is this true and suitable for an answer?

Compounds are two or more different types of elements and mixtures are a lot of elements made so that unless you use a good separating technique you would not be able to separate them. an example ...

Are compounds and elements mixtures - answers.com

Mixtures are formed when different substances come together without reacting together. Compounds are formed when elements or other compounds react together in a chemical reaction. Mixtures are not bonded to each other. Compounds are made of elements bonded together. Mixtures have the properties of all the substances within it.

The Difference Between Compounds And Mixtures? | Yahoo Answers

A mixture is 2 compounds or 2 elements in the same phase that are mixed together -- 2 solids, 2 liquids, 2 gases. Air is a mixture of many gases. Sea water is a mixture of water, salt, other electrolytes, animals, and whatnot. Etc. You need to just think about it and supply your list. Chemistry will NEVER be EASIER than this. Never. Good luck!
