Fingerprint Time Attendance Software Manual

Fingerprint identification, known as dactyloscopy, or hand print identification, is the process of comparing two instances of friction ridge skin impressions (see Minutiae), from human fingers or toes, or even the palm of the hand or sole of the foot, to determine whether these impressions could have come from the same individual. The flexibility of friction ridge skin means that no two finger ...

TimeTec will cease from issuing any TCMS V2 license starting from 1st July 2019. We strongly urge all our customers who are currently using TCMS V2 to migrate to Ingress or TCMS V3 immediately to avoid any support interruption in the future as Microsoft no longer releases any further updates or patches for FoxPro, which means we would not be able to rectify any issues of TCMS V2 in the future.

Manual systems. Traditionally manual systems were used that rely on paper cards which have times stamped onto them using a time stamping machine. Such machines were used for over a century but have since been phased out and replaced with cheaper automated systems which eliminate the need for payroll staff to manually input employee hours.
