2 Wire Vs. 4 Wire Fire Alarm System. Many homes in the U.S. have a fire alarm system installed, but not all homes have one that's working. The reason an alarm fails to work can be as simple as a dead battery or a wire that's frayed or disconnected. Fortunately, two-wire and four-wire systems are not difficult to install, operate and...

Interconnected smoke alarms increase safety. In a Consumer Product Safety Commission (CPSC) survey of households with any fires, including fires in which the fire department was not called, interconnected smoke alarms were more likely to operate and alert occupants to a fire. 1 People may know about a fire without hearing a smoke alarm. When smoke alarms (interconnected or not) were on all ...

Installing and maintaining smoke alarms - NFPA

Roughly seven people die every day in the U.S. as a result of home fires. Kids under the age of five have a much higher risk of dying in a residential fire compared to children in other age groups, according to the U.S. Fire Administration. In fact, among the thousands of children killed or injured in home fires each year, more than 40 percent are under five years of age.
