Modern United States Navy aircraft carrier air operations include the operation of fixed-wing and  
rotary aircraft on and around an aircraft carrier for performance of combat or noncombat missions.

Modern United States Navy aircraft carrier flight operations are highly evolved, based on experiences dating back to 1922 with USS Langley

An electronic flight bag (EFB) is an electronic information management device that helps flight crews perform flight management tasks more easily and efficiently with less paper. It is a general purpose computing platform intended to reduce, or replace, paper-based reference material often found in the pilot's carry-on flight bag, including the aircraft operating manual, flight-crew operating ...

As we said, these stricter rules are to help VFR and IFR aircraft avoid collisions in control zones. For example, an IFR aircraft in a control zone should not expect to encounter VFR aircraft in the first 500 ft after descending out of a cloud deck.. Here are a few things to keep in mind when flying VFR in a control zone: . There is no minimum reported ceiling for VFR flight in a control zone.
