Mobile device forensics is a branch of digital forensics relating to recovery of digital evidence or data from a mobile device under forensically sound conditions. The phrase mobile device usually refers to mobile phones; however, it can also relate to any digital device that has both internal memory and communication ability, including PDA devices, GPS devices and tablet computers.

Mobile device forensics - Wikipedia

Mobile telephony is the provision of telephone services to phones which may move around freely rather than stay fixed in one location. Mobile phones connect to a terrestrial cellular network of base stations (), whereas satellite phones connect to orbiting satellites. Both networks are interconnected to the public switched telephone network to allow any phone in the world to be dialed.

Mobile telephony - Wikipedia

The Telecommunications Entities Revenue Recognition Task Force has been created to address issues which may arise due to FASB's new revenue recognition standard. Here you will find the issues identified and further discussion.
