Though triangles are far and away the most common geometric shape on the SAT, make sure not to underestimate the importance of circles. You will generally come across 2-3 questions on circles on any given SAT, so it's definitely in your best interest to understand the ins and out of how they work.

Circles on SAT Math: Formulas, Review, and Practice

The area of a circle is given by the formula $A = \pi r^2$, where r is the radius of the circle. The problem provides the diameter of the circle, which is twice the radius. So, Now substitute this value into the area formula and calculate the area. 3. D. The perimeter of a figure is the length around it.
