NOTE: I HIGHLY recommend using version 2.12 of Scala with IntelliJ - 2.13 doesn't seem to play nicely with Gatling. Alternatively, if you are having trouble downloading the Scala binaries through IntelliJ, you can instead download the Scala binaries directly from Scala-lang. Click on Download the Scala binaries as in this screenshot:

Load Testing with Gatling - The Complete Guide | James Willett

This section describes the setup of a single-node standalone HBase. A standalone instance has all HBase daemons — the Master, RegionServers, and ZooKeeper — running in a single JVM persisting to the local filesystem. It is our most basic deploy profile. We will show you how to create a table in HBase using the hbase shell CLI, insert rows into the table, perform put and scan operations ...

Apache HBase™ Reference Guide

In tablets, there is only one activity that is Activity 1. In Activity 1, there are two fragments, Fragment A and Fragment B. When we select an item from Fragment A, it gets open in Fragment B of the same activity. In the case of mobiles, there are two activities that are: Activity 1 with Fragment A and Activity 2 with Fragment B.
