Exhibitionism was first described as a disorder in 1877 by French physician and psychiatrist Charles Lasègue. When exhibitionistic sexual interest is acted on with a non-consenting person or interferes with a person's quality of life or normal functioning, it can be diagnosed as exhibitionistic disorder in the Diagnostic and Statistical Manual of Mental Disorders, fifth edition ().

Incest / 'ɪ n s e s t / is human sexual activity between family members or close relatives. This typically includes sexual activity between people in consanguinity (blood relations), and sometimes those related by affinity (marriage or stepfamily), adoption, clan, or lineage.. The incest taboo is one of the most widespread of all cultural taboos, both in present and in past societies.

Anatomy of the cervix []. The cervix is the part of the inverted pear-shaped uterus that corresponds to the narrow stalk end of the pear. This cylindrical-shaped muscular structure is about 3-5 cm in length and lies partly in the upper vagina, extending superiorly into the retroperitoneal space behind the bladder and in front of the rectum.

#### Summary points Developmental assessment is the process of mapping a child's performance compared with children of similar age. The comparison group is obtained from a representative sample of the population that the child comes from. Several factors contribute to performance varying greatly between different population groups.<sup>1</sup> In a multicultural society it can be challenging to find ...
