This finds all registered users that have "foo" as part of their username by using the cut command to take the first field (username) of each line of the Unix system password file and passing them all as input to grep, which searches its input for lines containing the character string "foo" and prints them on its output.. Common Unix filter programs are: cat, cut, grep, head, sort, uniq, and tail.

Filter (software) - Wikipedia

If debugging is the process of removing bugs, then programming must be the process of putting them in. ~Edsger Dijkstra If you cannot grok the overall structure of a program while taking a shower, e.g., with no external memory aids, you are not ready to code it. ~Richard Pattis
