So in 1952, Miller began the most famous experiment on the origin of life ever attempted. The set-up was simple. Miller connected a series of glass flasks and circulated four chemicals that he suspected were present on the early Earth: boiling water, hydrogen gas, ammonia and methane.

BBC - Earth - The secret of how life on Earth began

Who is right? Did we evolve or were we created? Start your research here by watching the following two short videos; the first is about the theory of the evolution of human beings , while the second begins to look at miraculous healing. Alternatively use the menu to select pages that will answer your most pressing life questions.

How did life begin

Chapter12 packet. Because the ability to cause disease was inherited by the offspring of the transformed bacteria, he concluded that the transforming factor had to be a gene. In 1944, Oswald Avery tested the transforming ability of many substances. Only DNA caused transformation. By observing bacterial transformation,...

Chapter12 packet - SlideShare

Hinduism or Sanatana Dharma ("eternal spiritual path") began about 4000 years ago in India. It was the religion of an ancient people known as the Aryans ("noble people") whose philosophy, religion, and customs are recorded in their sacred texts known as the Vedas. These texts were initially handed down by word of mouth from teacher to student.
