Abstract: In the near future, i.e., beyond 4G, some of the prime objectives or demands that need to be addressed are increased capacity, improved data rate, decreased latency, and better quality of service. To meet these demands, drastic improvements need to be made in cellular network architecture. This paper presents the results of a detailed survey on the fifth generation (5G) cellular ...

LTE-Advanced Is the Real 4G More network capacity, faster data speeds, and better coverage will come from LTE-Advanced mobile technologies

### **LTE-Advanced Is the Real 4G - IEEE Spectrum**

Abstract: The vision of next generation 5G wireless communications lies in providing very high data rates (typically of Gbps order), extremely low latency, manifold increase in base station capacity, and significant improvement in users' perceived quality of service (QoS), compared to current 4G LTE networks. Ever increasing proliferation of smart devices, introduction of new emerging ...

Fantastic 4G Hundreds of telecoms will invest in 4G LTE networks in 2012 ... which makes 4G base stations, sells equipment for at least 15 different bands. ... IEEE is the world's largest ...

### **Fantastic 4G - IEEE Spectrum**

This paper summarizes Wi-SUN communication systems and their physical (PHY) layer and media access control (MAC) specifications. Firstly, the Wi-SUN communication systems are categorized into three. The key PHY and MAC standards, IEEE 802.15.4g and .4e, that configure the systems are explained, and fundamental transmission performances of the systems in the PHY layer and MAC layer are ...
