Does diagnosing canine hyperadrenocorticism make your head tilt? "Dr. Endocrine" can help. (Getty Images) Some weeks it seems like every single low-dose dexamethasone suppression test (LDDS) or adrenocorticotropin hormone (ACTH) stimulation test you perform yields ambiguous results. ARGH! So, what's a diagnostician like you to do (besides stay awake all night and agonize over the outcomes)?

Diagnosing canine hyperadrenocorticism: You have questions ...

Asthma and allergies affect millions of people and some don't even know it. If you sometimes have trouble taking a good deep breath, cough at night or have a stuffy or runny nose and itchy eyes, take this simple test.

What causes child allergy? In an allergic person, the immune system recognizes some proteins as foreign. These proteins are called allergens. An allergen may be a food, an airborne particle like pollen or dust or a medicine.. In an allergic person, the body thinks the allergen is a danger so attacks it with antibodies.

Child Allergy - answers to common medical questions about ...

I did the exam 5 days ago for MLS. I didn't make it. The questions are not that difficult but i made a mistakes of rushing trough the answers until i reached 100 questions to save as much time as i need so that i can go back and change the answers by reading it thoroughly in the flagged reviews question.

Abstract. The innate immune system is the phylogenically oldest component of the human immune system. Although it is ancient, the innate immune system is highly complex and consists of barriers to infection (epithelia of skin, gastrointestinal, respiratory, genitourinary tracts), antimicrobial peptides and proteins, humoral components (i.e. complement and opsonins) and cellular components (i.e ...
