Combining like terms calculator - Algebrator

In this final program, students see how the various techniques of algebra that they have learned can be applied to the study of probability. The program shows that games of chance, health statistics, and product safety are areas in which decisions must be made according to our understanding of the odds.

PatrickJMT: making FREE and hopefully useful math videos for the world!

PatrickJMT

Trinomials: An expression with three terms added together. $2x^2 + 6x - 8$ will serve as our lucky demonstrator. First, factor out the GCF. This will ALWAYS be your first step when factoring ANY expression. $2(x^2 + 3x - 4)$ If you end up with a power of x greater than two after factoring out the GCF, move on to another step. List the integer factors of the constant.

How to Factor: 10 Steps (with Pictures) - instructables.com

Watch this video lesson to learn how you can solve a system of linear equations in two variables by using the substitution method. Learn how easy it is to use on any linear system in two variables ...
