Influenza, commonly known as the flu, is an infectious disease caused by an influenza virus. Symptoms can be mild to severe. The most common symptoms include: high fever, runny nose, sore throat, muscle pains, headache, coughing, sneezing, and feeling tired. These symptoms typically begin two days after exposure to the virus and most last less than a week.

Influenza - Wikipedia

Misconceptions about Flu Vaccines Can a flu vaccine give you the flu? No, flu vaccines cannot cause flu illness. Flu vaccines given with a needle (i.e., flu shots) are currently made in two ways: the vaccine is made either with a) flu viruses that have been 'inactivated' (killed) and that therefore are not infectious, or b) using only a single gene from a flu virus (as opposed to the full ...
