The XMLParse Function is a key integration function developed as a custom extension for Informatica PowerCenter transformations. Usage of the function is limited only to the creative solution imagination of the end users; however a sample mapping and data source are provided to test the function immediately upon your installation of the product.

XMLPARSE FUNCTION FOR INFORMatica POWER CENTER

analytic-function (arguments): A Vertica analytic function and its arguments.. OVER: Specifies how to partition, sort, and window frame function input with respect to the current row. The input data is the result set that the query returns after it evaluates FROM, WHERE, GROUP BY, and HAVING clauses.. An empty OVER clause provides the best performance for single threaded queries on a single node.
