building. Specify blown-in insulation instead of rigid and spray foam insulations

## **INSULATION - Carbon Smart Materials Palette**

Polyisocyanurate, also referred to as PIR, polyiso, or ISO, is a thermoset plastic typically produced as a foam and used

## Read Free Insulation The Production Of Rigid Polyurethane Foam

as rigid thermal insulation. The starting materials are similar to those used in polyurethane except that the proportion of methylene diphenyl diisocyanate is higher and a polyester-derived polyol is used in the reaction instead of a polyether polyol. The resulting chemical structure is significantly different, with the isocyanate groups on the MDI
