The negative health effects of water pollution remain a major source of morbidity and mortality in China. The Chinese government is making great efforts to strengthen water environment treatment; however, no studies have evaluated the effects of water treatment on human health by water pollution in China.

Industrial water pollution, water environment treatment ...

1. Introduction. Data envelopment analysis (DEA) is recognized in the literature as a powerful method, more suitable for performance measurement activities than traditional, econometric methods such as regression analysis and simple ratio analysis , .DEA is a mathematical method using linear programming techniques to convert inputs to outputs with the purpose of evaluating the performance of ...

A perpetuity is an annuity that has no end, or a stream of cash payments that continues forever. There are few actual perpetuities in existence. For example, the United Kingdom (UK) government issued them in the past; these were known as consols and were all finally redeemed in 2015. Real estate and preferred stock are among some types of investments that effect the results of a perpetuity ...

AbstractThe purpose of this article is to provide insights into hotel efficiency and investigate which hotels are performing better. Hotel efficiency is examined using data envelopment analysis (DEA) and the output-oriented BCC model is applied on the hotels' internal accounting information. The study further explores whether there are differences in efficiency between hotels of different ...

En köpoption, eller en call (av engelskans call option), är ett finansiellt kontrakt mellan två parter, utfärdaren (säljaren) och innehavaren (köparen) av en option.Optionens värde beror på en underliggande, som kan vara av vitt skilda slag, exempelvis priset på en aktie, nivån på ett aktieindex eller en valutakurs.

Köpoption - Wikipedia

Introduction Nearly every organization faces the problem of allocating limited capital and other scarce resources (including people) across project investments. Organizations typically address the capital allocation problem by specifying a (more or less) fixed budget for funding projects within a

specified time period (e.g., the upcoming year).

Mathematical Methods for Portfolio Optimization

La economía matemática es la aplicación de métodos matemáticos para representar teorías y analizar problemas en la economía. Por convención, los métodos aplicados se refieren a aquellos que van más allá de geometría simple, como cálculo diferencial e integral, ecuaciones diferenciales, álgebra de matrices, programación matemática y otros métodos computacionales.
