The keyword extends indicates that you are making a new class that derives from an existing class. The existing class is called the superclass, base class, or parent class. The new class is called the subclass, derived class, or child class. The terms superclass and subclass are those most commonly used by Java programmers, although some programmers prefer the parent/child analogy, which also ...

The Medang Empire or Mataram Kingdom was a Javanese Hindu-Buddhist kingdom that flourished between the 8th and 11th centuries. It was based in Central Java, and later in East Java. Established by King Sanjaya, the kingdom was ruled by the Sailendra dynasty.. During most of its history the kingdom seems have relied heavily on agriculture, especially extensive rice farming, and later also ...
