Publications in this journal. Namely, we study, in terms of an point and a point, a necessary condition for uniqueness of the best dominated approximation under the relation in a symmetric space . Next we characterize a relation between a point of α -order continuity and an existence of a best dominated approximant with respect to .

In mathematics, approximation theory is concerned with how functions can best be approximated with simpler functions, and with quantitatively characterizing the errors introduced thereby. Note that what is meant by best and simpler will depend on the application.. A closely related topic is the approximation of functions by generalized Fourier series, that is, approximations based upon ...
