History. The evolution of the kitchen is linked to the invention of the cooking range or stove and the development of water infrastructure capable of supplying running water to private homes. Food was cooked over an open fire. Technical advances in heating food in the 18th and 19th centuries changed the architecture of the kitchen.

Published article on the dangers of kitchen range hoods. The following industry design guides do not replace the need for a design professional - in all cases the authority having jurisdiction must be consulted and where guidance is absent consult with a design professional. Gas ranges should have at least 100 cfm exhaust air per 10,000 Btu/hr input and a minimum of 500 cfm.
