Abstract. The critical nature of the microbiology laboratory in infectious disease diagnosis calls for a close, positive working relationship between the physician/advanced practice provider and the microbiologists who provide enormous value to the healthcare team.

Laboratory Diagnosis of Infectious Diseases - idsociety.org

Diagnosis. Your doctor will likely diagnose inflammatory bowel disease only after ruling out other possible causes for your signs and symptoms. To help confirm a diagnosis of IBD, you may have one or more of the following tests and procedures:

Inflammatory bowel disease (IBD) - Diagnosis and treatment ...

Diagnosis is the identification of the nature and cause of a certain phenomenon. Diagnosis is used

in many different disciplines with variations in the use of logic, analytics, and experience to determine "cause and effect". In systems engineering and computer science, it is typically used to determine the causes of symptoms, mitigations, and solutions.

The main work of the kidneys is performed by units called nephrons, which filter the blood flowing into the kidneys. The measure of the nephrons' function is called glomerular filtration rate (GFR). There is more information about the glomerular filtration rate here. GFR can be helpful for early detection of CKD.
