

*Lesson Practice B Equivalent Fractions And Mixed Numbers*

### **Lesson Practice B Equivalent Fractions**

Students will practice coming up with equivalent fractions in a fast paced challenge! This is an introductory lesson to equivalent fractions.

### **Evaluating Equivalent Fractions | Lesson plan | Education.com**

Does your child know that  $\frac{1}{2}$  is the same as  $\frac{2}{4}$  and  $\frac{3}{6}$ ? Called equivalent fractions, these fractions are all equal. Kids practice identifying equivalent fractions on this colorful worksheet.

This is how the story usually goes: In early elementary school, you brought home A's and B's in math. You were excited about learning and no one subject seemed any harder than another.

### **Real Help With Fractions | Help With Fractions**

Definition: A fraction names part of a region or part of a group. The top number of a fraction is called its numerator and the bottom part is its denominator. So a fraction is the number of shaded parts divided by the number of equal parts as shown below:

### **Fractions - Math Goodies**

These fractions have unlike denominators (and unlike numerators). It would be easier to compare them if they had like denominators. We need to convert these fractions to equivalent fractions with a common denominator in order to compare them more easily. Josephine:

### **Comparing Fractions | Math Goodies**

"In this module, students extend and deepen Grade 2 practice with equal shares to understanding fractions as equal partitions of a whole (2.G.3). Their knowledge becomes more formal as they work with area models and the number line. Throughout the module, students have multiple experiences working with the Grade 3 specified fractional units of halves, thirds, fourths, sixths, and eighths.

These are all integers (click to mark), and they continue left and right infinitely: Some People Have Different Definitions! Some people (not me) say that whole numbers can also be negative, which makes them exactly the same as integers.. And some people say that zero is NOT a whole number. So there you go, not everyone agrees on a simple thing!
