Abstract. In this paper, we propose an automatic method to measure the reading difficulty of Japanese words. The proposed method uses a statistical transliteration framework, which was inspired by statistical machine translation research.

A Method to Measure the Reading Difficulty of Japanese Words

TIP: Journals often set a maximum word count for Abstracts, often 250 words, and no citations. This is to ensure that the full Abstract appears in indexing services. Keywords are a tool to help indexers and search engines find relevant papers. If database search engines can find your journal manuscript, readers will be able to find it too.

It is generally assumed that orthographic-phonological (O-P) consistencies are higher for Japanese kana words than for kanji words and that orthographic-semantic (O-S) consistencies are higher for kanji words than for kana words. In order to examine the validity of these assumptions, we attempted to measure the O-P and O-S consistencies for 339 kana words and 775 kanji words.

The traditional approach to presenting idioms relies mainly on teachers' or materials writers' judgement, one-by-one and quite incidentally; and the existing teaching materials and references for idioms are mostly intuition-based. However, a more recent approach to better teaching and learning idioms is to present them under categories of their common themes and topics.
